KEY SKILLS

- Operation & Maintenance (O&M)
- Automation (PLC, HMI, SCADA, DCS)
- FullStack Development
- Java, JavaScript, C, Python
- PowerBI
- PowerAutomate
- Databases (MySQL)
- RESTful APIs
- Control Systems
- Project Management

EDUCATION

Electronic Engineering
Universidad ORT Uruguay, Montevideo
March 2019 – March 2025
Grade Average: 88%

First Certificate (FCE B2)
Instituto Cultural Anglo, Canelones
March 2009 – November 2019

PROFESSIONAL PROFILE

Electronic Engineer with experience in **Operation and Maintenance (O&M)** of critical infrastructure and FullStack development. Specialized in ensuring operational continuity of industrial systems, implementation of control strategies, and technology asset management. I combine on-site technical capabilities with software development skills to optimize processes.

WORK EXPERIENCE

Automation Engineer for O&M

Stiler Project Management, Montevideo
July 2023 – Present

- **Operation & Maintenance (O&M):** Comprehensive management and troubleshooting of sanitation pumping stations, ensuring 24/7 availability.
- **Critical Infrastructure:** Preventive and corrective maintenance of Distributed Control Systems (DCS) and electrical networks (~2000 I/O).
- **Industrial Automation:** PLC programming and HMI/SCADA interface redesign to improve operational efficiency.
- **Asset Management:** Hardware specification and technical coordination with national and international suppliers.
- **Digitalization:** Implementation of PowerBI reports for predictive maintenance and discharge analysis using PowerAutomate.
